FIWARE

Unlock an open smart future through pioneering technologies and standardization

We aim to become a unique entity driving collaboration to transform data into a universal value, fueling progress and enabling smart solutions worldwide.
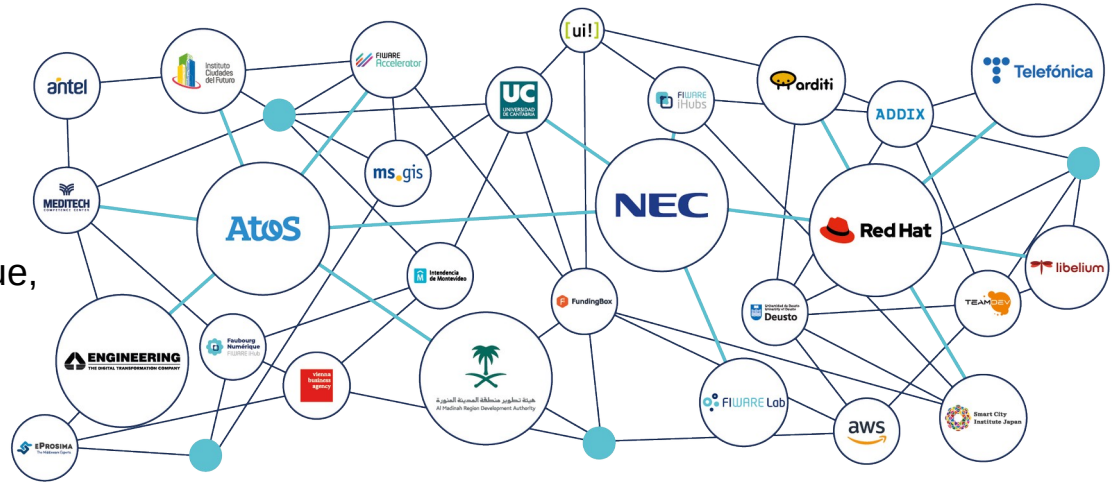

Strategic Objectives

Scale alongside network expansion while fostering a growth-mindset within the community

Expand our global outreach through trusted and proven adoption

Enhance the value proposition for technology through co-creation and adoption of standards and enterprise-grade assets

Increase market footprint through strategic initiatives that generate positive ROI for our community

FIWARE

Scale alongside network expansion while fostering a growth-mindset within the community

Leverage **members contributions** for documentations and resources.

Implement **mentorship programs** offering guidance, support, and knowledge sharing.

Organize **workshops and hackathons** to encourage learning and experimentation focused on specific technical skills, projects development and problem solving challenges.

Champion open-source best practices to ensure **quality and encourag**e a growth-mindset towards continuous improvement.

FIWARE

Expand our global outreach
through trusted and proven adoption

Forge **alliance** with governmental organisations, and private sectors leaders to create value-added services.

Implement **certifications and Trust** framework.

Establish open-source hubs to **collaborate, share resources** and foster a **thriving community**.

Host **events** (webinars, workshops, hackathons) to connect with the community, share best practices and educate potential users about open-source projects.

FIWARE

Enhance the value proposition for technology through co-creation and adoption of standards and enterprise-grade assets

Drive **value** with **data analytics**.

Implement **robust asset** management practices.

Advocate for open standards through awareness campaigns, policy discussions and vertical alliance.

Foster **open innovation ecosystems** where business, developers and other stakeholders collaborate.

FIWARE

Increase market footprint through strategic initiatives that generate positive ROI for our community

Establish and cultivate **local partnerships**

Engage with the **community** in events (including innovation workshops and lab).

Inclusive product/service development by **involving the community in the development process** of new product and services.

Implement **collaborative sustainability** initiatives

FIWARE

Thank you!
