IDSA Ambassador

Long history in Telecom industry

Herman Pals
TNO

Why Telecom Operators in data spaces?

- Largest worldwide federated ecosystem

- Already delivering data and VPN services

- Active in all sectors

- Open model towards application service providers

- Retail competition while back-end collaboration

- Regional presence and offices

How telcos realize data spaces to deliver benefits to end users

Sven Löffler
T-Systems international

Mario Meir-Huber
Magenta Telekom

Panel questions

- What are key challenges and/or requirements to make data spaces successful as Telecom offering?

- How can telecom operators speed up adoption of data spaces and what do you need/want form others?

- Which will be the primary sectors from your perspective to launch data space services?

If needed in time (I guess not):
- What will be the main components of your Telco offering?

And I will end with this question:
- What's your key message in one or two sentences for the audience?

Why Telecom Operators in data spaces?
