

Data Spaces Symposium

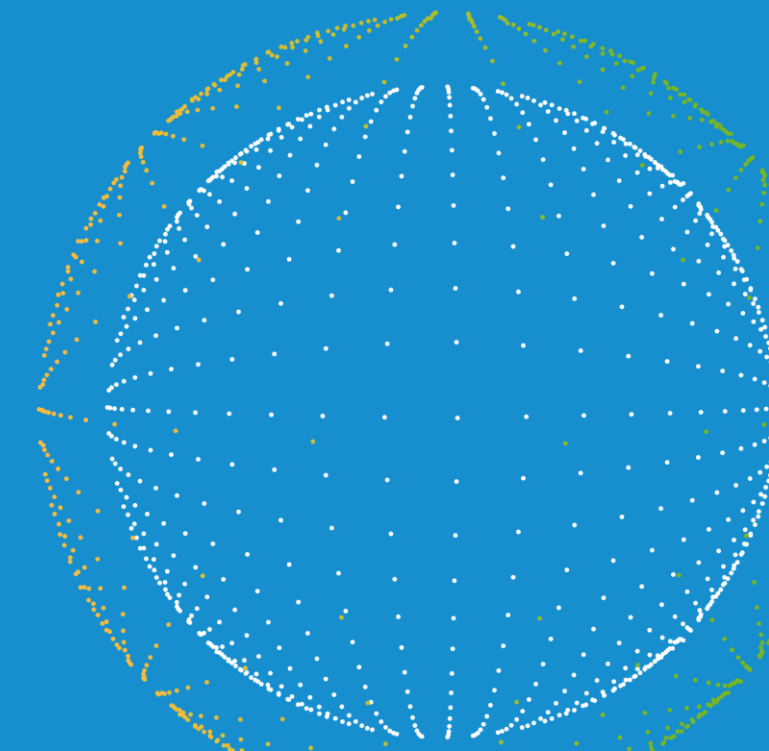

Green Deal Data Space for Sustainability & Resilience

Dr. Reinhold Achatz
International Data Spaces Association
Chairman of the Board

Green Deal Data Space

- Green Deal Data Space is the umbrella platform for all sustainability and resilience use cases
- Platform based on IDSA standards
- Cross domain
- Open for all / non-profit organization
- Planned working groups:
 - Resilience
 - Emission Data (Sustainability)
 - Biodiversity
 - Manufacturing-X
 - others
- Circa 2'4 million data sets available today
- Multiple services
- Cross border data exchange will be supported

Green Deal Data Space – Use case examples

- Sustainability / Emission data use case
 - ✓ Provides data for Life cycle assessment
 - ✓ Support for EU Taxonomy reporting
 - ✓ CBAM – Carbon Border Adjustment Mechanism – data
 - ✓ REACH data communication
- Resilience use case
 - ✓ A supply chain radar will support companies with company specific analyses of supply chain risks generated by events in their supply chain.
 - ✓ Trusted Data Hub: Privacy Preserving
 - ✓ Multiparty Data-Sharing Tool
