INTERNATIONAL DATA
SPACES ASSOCIATION

One Voice

And a common framework, based on existing architectures and models, leveraging each other's efforts on infrastructure and implementations to make data spaces happen.

Sharing the Expertise

Bringing together data providers, users and intermediaries, data spaces are key to driving businesses to competitively extract value out of data.

Pooling the Members

1,000+ leading key industry players, research organizations, innovators, and policy-makers worldwide.

On our way to a common data spaces framework

INTERNATIONAL DATA SPACES ASSOCIATION

DATA SPACES SUPPORT CENTRE

- Assemble reference work based on consensus
- Resolve issues in existing working groups
- Harmonize technology, architecture, frameworks

- Make this converged framework the centerpiece of the Data Spaces Blueprint
- Amend elements based on a bigger scope
- Approve and safeguard compatibility

- Make the blueprint core design principle for European projects and endeavors
- Collect feedback from projects and provide change requests
- Support projects and provide usable building blocks

DSBA

Change requests

Regulatory, business and technical foundation for data spaces within the Edge-Cloud-Continuum
